DETAILED ACTION

Drawings

1. The replacement drawings were received on 12/8/09. These drawings are acceptable.

Response to Amendment

2. The amendments to the title, abstract, and specification of the disclosure in the submission filed 12/8/09 are acknowledged and accepted. In view of these amendments, the objections to the specification in Sections 6, 7, 9 of the Office Action dated 10/15/09 are respectfully withdrawn.
3. The amendments to Claim 1 in the submission filed 12/8/09 are acknowledged and accepted. In view of these amendments, the objections to the claims in Section 10 of the Office Action dated 10/15/09 are respectfully withdrawn.

Response to Arguments

4. The Applicant's arguments, see in particular Pages 10-17 of the submission, filed 12/8/09, with respect to the rejections of Claims 1-7 in Sections 12-14 of the Office Action dated 10/15/09, have been fully considered and are persuasive. The rejections of Claims 1-7 in Sections 12-14 of the Office Action dated 10/15/09 have been withdrawn.

Allowable Subject Matter

5. Claims 1-7 are allowed.

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alicia M. Choi (703-720-7800) on 1/20/10.

The application has been amended as follows:

Abstract, line 14, after "Wavelength bands of", change "light reflected form the" to --light reflected from the--.

7. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a wavelength filter, as generally set forth in Claim 1, the wavelength filter including, in combination with the features recited in Claim 1, the wavelength filter is configured so that a cross-sectional figure of respective first portions in the Y direction and perpendicular to the substrate surface is provided with at least one protruding portion so as to become wider in the width of Y direction than that of neighboring portions within a predetermined range of distance apart from the substrate surface by a predetermined distance in Z direction to form plural waveguide layers parallel to the substrate surface and divided by regions parallel to the substrate

Art Unit: 2872

surface in the predetermined range of distance, each of the waveguide layers reflecting light satisfying $\beta \equiv \frac{2\pi}{\lambda} \sin \theta + \frac{2\pi}{\Lambda}$ where θ represents an incident angle to the substrate of the light, and β represents a propagation factor of said each waveguide layers, and that wavelength bands of light reflected from the plural waveguide layers shift while overlapping with each other to reflect light with a wavelength band broader than that of light reflected from a single waveguide layer. Claims 2-7 are dependent on Claim 1, and hence are allowable for at least the same reasons Claim 1 is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5472798 to Kumazawa et al.

U.S. Patent No. 6248436 to Kumazawa et al.

U.S. Patent No. 6306529 to Shimizu et al.

The above listed prior art are similar in structure and operation to that of Tabata et al. However, all the prior art, including those listed above, fail to teach or reasonably suggest the limitations recited in Section 7 above.

Art Unit: 2872
